

Program Update – 2015.01

January 12, 2014

Pepco and Delmarva Power C&I Energy Savings Program Update

Dear Pepco and Delmarva Power Customers and Commercial and Industrial Program participants:

Thank you for participating in the Pepco and Delmarva Power Commercial and Industrial Energy Savings Program. This letter is to provide an update regarding applications that have been submitted and are currently awaiting pre-approval, as well as provide an update regarding the 2015-2017 Program.

The Public Service Commission has authorized the Pepco and Delmarva Power 2015-2017 Program with minor modifications. The 2015-2017 Program is expected to launch by February 1, 2015.

- Pepco and Delmarva Power are working to launch the new program cycle as quickly as possible, including: updates to the website, updates to the contracts and trade ally terms and conditions, updates to the program application workbooks, and any changes ordered by the Commission. The Program will communicate via email and website when 2015 Application Workbooks are available for submittal to the program. These must be used for all new applications. All applications will require pre-approval before installation.
- All Applications currently awaiting pre-approval will receive a pre-approval notification in the month of January 2015. Notification of pre-approval for applications assigned for pre-inspections may be delayed until inspections can be completed, however incentives have been reserved.

Please continue to submit signed invoices and final paperwork for installed projects.

If you have any questions, please contact customer service at 866.353.5798 if you are a Pepco customer or 866.353.5799 if you are a Delmarva Power customer.

Sincerely,

A handwritten signature in black ink that reads "Mark L. Bailey".

Mark Bailey,

Program Manager

Pepco and Delmarva Power C&I Energy Savings Program
